

### **REMARKS**

Entry of the present amendment is respectfully requested. The amendment places the application in condition for allowance and is, therefore, appropriate under *Ex Parte Quayle* practice.

By the present amendment, the specification has been amended to provide appropriate heading and to delete reference to the claim in the body of specification. The drawing has been amended to provide descriptive legends where appropriate.

Based on the foregoing amendments and the following remarks, the application is deemed to be in condition for allowance, and action to that end is respectfully requested.

In response to the objections of the Examiner, the specification and the drawing have been amended, as requested by the Examiner.

The undersigned have reviewed the specification and the drawing and found out that all of the reference numerals referred to the specification are found in the drawings, and that the specification describes all referenced elements of the drawings.

## CONCLUSION

In view of the foregoing, it is respectfully submitted that the application is in condition for allowance, and allowance of the application is respectfully requested.

Should the Examiner require or consider it advisable that the specification, claims and/or drawings be further amended or corrected in formal respects in order to place the case in condition for final allowance, it is respectfully requested that such amendment or correction be carried out by Examiner's Amendment and the case passed to issue. Alternatively, should the Examiner feel that a personal discussion might be helpful in advancing this case to allowance, the Examiner is invited to telephone the undersigned.

Respectfully submitted,

  
Alexander Zinchuk
